

durgol®
universal

Fast Decalcifier
for household appliances,
fixtures and surfaces

highly effective • gentle • food-safe

DIN 21077

The Swiss Original against
Limescale since 1951

durgol® universal

quickly removes limescale from all household items. Its formula guarantees efficient, yet gentle, food-safe and environmentally friendly decalcification. It has a neutral odour and produces no vapours.

Instructions for use

Filter coffee machines: Fill 1-2 cups of durgol® universal into the water tank and dilute it with the same amount of cold tap water. Run the solution through a complete cycle of your machine, then rinse with 1-2 tanks of tap water. Please consult manufacturer's instructions.

Metal, plastic or glass containers (e.g. kettles, pots, vases): Depending on the degree of calcification present, fill the container with either diluted or undiluted durgol® universal up to the edge of the lime deposits and wait up to 1 hour. Then rinse thoroughly with cold tap water.

Faucet aerators, shower heads, nozzles: Place in a glass or plastic container filled with undiluted durgol® universal. After approx. 10 minutes, rinse with cold tap water.

Fixtures and surfaces (e.g. faucets, sinks, tile, shower walls): Clean with a cloth soaked in durgol® universal. Immediately rinse with cold water and wipe dry.

General advice

Only use a cold solution of durgol® universal (diluted or undiluted) and only use it on unheated items (except coffee machines). Do not use in combination with other cleaning products. Avoid contact of durgol® universal with acid-sensitive surfaces such as marble, limestone, thin or damaged chrome plating, certain types of chrome, steel, enamel and silver, as they can be damaged by the decalcifier.

Keep out of reach of children. Do not swallow. Avoid contact with eyes or skin. Upon eye or skin contact wash immediately with plenty water.

Contains amidosulfonic acid, care agents and excipients
