2. Remove seeds from the red pepper and lay on a baking tray with the whole cherry tomatoes.
3. Roast the tomatoes and pepper slowly in the oven for 90 mins to reduce the moisture and concentrate their sweet flavour. Halfway through, add the wrapped garlic to the roasting tray.
4. Set up the fine grating/shredding disc and grate the parmesan cheese on 'HIGH'.
5. Remove the disc and set up the small work bowl with the small chopping/mixing blade.

- 1 tsp Sea Salt
- 20g Chopped Anchovies (optional)
- 3 tbsp Extra Virgin Olive Oil

CHOCOLATE & HAZELNUT SPREAD

INGREDIENTS

- 375g Hazelnuts
- 150ml Maple Syrup
- 3 tbsp Cocoa Powder
- 150ml Water

Hints & Tips

Add liquid in a slow, steady stream, only as fast as dry ingredients absorb it. If liquid sloshes or splatters, stop adding it but do not turn off the machine. Wait until ingredients in bowl have mixed, then add remaining liquid slowly.

The cocoa can be replaced with raw cocoa powder to create a 'healthier' alternative.

METHOD

1. Preheat the oven to 200°C (fan 180°C)/ 400°F/ Gas Mark 6.
2. Bake the hazelnuts for approximately 10 minutes, being careful not to burn them. Remove from the oven and allow to cool slightly.
3. Wrap the hazelnuts in a clean tea towel and gently rub them together to remove the skins.
4. Set up the large chopping/mixing blade and place the skinned hazelnuts into the large work bowl.
5. Process on 'HIGH' for 8 to 10 minutes until they become a fine grainy paste.
6. Add the maple syrup and cocoa then process again on 'HIGH' ensuring the ingredients are thoroughly mixed.
7. Gradually add the water through the feed tube while continuing to process until the mixture comes together as a smooth butter.

PEANUT BUTTER

INGREDIENTS

- 450g Roasted Unsalted Peanuts (shelled and peeled)
- ½ tbsp Ground Nut Oil
- Sea Salt (qty to taste)
- 1-3 tsp Honey (optional)

Hints & Tips

If you prefer your peanut butter crunchy, hold back approx. 100g of nuts and roughly chop them using the small work bowl. Add them when you supplement with salt or honey at the end of the process.

METHOD

1. Set up the large chopping/mixing blade in the large work bowl.
2. Place half the nuts in the bowl and chop on 'HIGH' for about 15 seconds so they break up.
3. Add the remaining nuts and process on 'HIGH', allowing the processor to keep running until a compact mass starts to form (the peanuts will no longer resemble nuts). This could take approx. 5 minutes. If necessary, scrape the sides down with a spatula.
4. Add the ground nut oil and continue to run the processor on 'HIGH' until a paste forms. The nuts will release their own oils. This process can take between 10-15 minutes.
5. When you are happy with the consistency add salt to taste or sweeten with honey.
6. Run the machine on 'PULSE' just enough to mix through.
7. Spoon into a jar and store in the fridge for up to a month.

WILD GARLIC MAYONNAISE

INGREDIENTS

- 2 Egg Yolks
- 1 tsp Dijon Mustard
- 1 Lemon (juiced)
- 150ml Olive Oil
- 150ml Groundnut Oil
- 30g Wild Garlic Leaves (chopped)
- 2-3 tbsp Water
- Sea Salt and Black Pepper

Hints & Tips

Wild garlic is easily found in the hedgerows during spring, if this is unavailable replace with 2 cloves of crushed garlic.

METHOD

1. Set up the small work bowl with the small chopping/mixing blade.
2. Add the egg yolks, dijon mustard and lemon juice and blend briefly using the 'PULSE' function.
3. With the processor on 'LOW', gradually add the oils. Start off very slowly, allowing the emulsion to begin forming.
4. Add the wild garlic leaves and a little salt and pepper and continue to blend.
5. Then blend in enough water to thin the mayonnaise down to a good dipping consistency.
6. Place in a sealable container and store in the fridge.

QUICK VEGETABLE STOCK

INGREDIENTS

- 2 Medium Carrots
- 1 Large Onion
- 2 Celery Stalks
- 1 Clove of Garlic (peeled)
- 1 Bay Leaf
- Sprig of Thyme or Parsley Stalks
- A few Black Peppercorns
- 1 tbsp Olive Oil

METHOD

1. Wash and peel the vegetables.
2. Set up the medium grating/shredding disc in the large work bowl and grate the carrots, onion, celery and garlic on 'HIGH'.
3. Heat the olive oil in a pan on a medium heat.
4. Add the grated vegetables, peppercorns, and herbs to the pan.
5. Sauté, stirring occasionally for approx. 5 minutes until the vegetables have softened slightly.
6. Add 1 litre of water, bring to the boil then simmer uncovered for approx. 10 minutes.
7. Strain the stock and use immediately or allow to cool and refrigerate.

PIZZA DOUGH

INGREDIENTS

MAKES APPROX. 2 SMALL PIZZA BASES

- 125g Strong White Flour
- 100g Spelt Flour

- 1 tbsp Olive Oil
- 140ml Warm Water

1. Set up the large chopping/mixing blade in the large work bowl.
2. Add the flours, yeast, salt and sugar then process using the 'PULSE' function for a few seconds to combine.
3. Remove the pusher accessory and using the 'PULSE' button, slowly pour the olive oil and then the water through the feed tube.
4. Once the dough starts to clean the inside of the work bowl press the 'LOW' button and continue to process for 10-20 seconds.
5. Stop the processor and test the dough to ensure it is properly kneaded. If it feels hard, lumpy or uneven, continue processing until it feels uniformly soft and pliable. Be careful not to overwork the dough. Do not worry if it is slightly sticky.
6. Lightly dust your work surface with a little flour.
7. Turn the dough out onto your floured work surface and work the dough into a ball, lightly with hands, until smooth and pliable.
8. Place into a large polythene bag or covered bowl and leave in a warm place for approximately 1½ hours or until it has doubled in size.
9. Dust hands with flour before knocking the dough back. Shape into 2 balls and roll out to the size of your pizza pan using a rolling pin. Do not be afraid to add a dusting of flour to ensure that the dough does not stick to the work surface or the rolling pin.
10. Lift onto the pan and press out the edges.
11. Top your pizza with your favourite toppings and bake in a preheated at 220°C/425°F/Gas Mark 7 (approx. 10-15 min).

BASIC WHITE BREAD

INGREDIENTS

MAKES A 700g LOAF

- 500g Strong White Flour
- 1 tsp Fast Action Yeast
- 1½ tsp Salt
- 2 tsp Caster Sugar
- 1 tbsp Sunflower Oil
- 300ml Warm Water

Hints & Tips

Add liquid in a slow, steady stream, only as fast as dry ingredients absorb it. If liquid sloshes or splatters, stop adding it but do not turn off the machine. Wait until ingredients in bowl have mixed, then add remaining liquid slowly. Pour liquid onto dough as it passes under feed tube opening. Do not pour liquid directly onto bottom of bowl.

For textured dough, you may add ingredients such as cheese, nuts and raisins 5 seconds before you stop kneading.

METHOD

1. Set up the large chopping/mixing blade in the large work bowl. Add the flour, yeast, salt and sugar, then process using the 'PULSE' button for a few seconds to combine.
2. Remove the pusher accessory and using the 'PULSE' button, slowly pour the oil and water through the feed tube. Once the dough starts to clean the inside of the work bowl press the 'LOW' button and continue to process for 5-10 seconds.
3. Stop the processor and test the dough to ensure it is properly kneaded. If it feels hard, lumpy or uneven, continue processing until it feels uniformly soft and pliable. Be careful not to overwork the dough. Do not worry if it is slightly sticky.
4. Lightly dust your work surface with a little flour. Turn the dough out onto your floured work surface and work the dough into a ball, lightly with hands, until smooth and pliable.
5. Place into a large polythene bag or covered bowl and leave in a warm place for approximately 1½ hours or until it has doubled in size.
6. Remove from the bag or bowl and knock back and shape. Place in 2 x 450g well-greased loaf tins or 1 x 900g well-greased loaf tin and stand in a warm place until well risen (approximately 50 minutes).
7. Place in a preheated oven (220°C/425°F/Gas Mark 7) and bake for approximately 20-25min for a small tin, 30-35 minutes for a large tin, or until golden brown. The loaf should sound hollow when removed from the tin and tapped on the bottom.
8. Remove from the oven and turn onto a wire rack to cool.

Troubleshooting

Dough is too dry

While machine is running, add water, 1 tablespoon at a time until dough cleans the inside of the bowl.

Dough is too wet

While machine is running, add flour, 1 tablespoon at a time until dough cleans the inside of the bowl.

Lump of dough forms on top of blade and does not become uniformly kneaded

Stop machine, carefully remove dough, divide it into 3 pieces and redistribute them evenly in the work bowl.
