

E-cloth[®]

SCREEN CLEANING PACK

The special E-cloth fibres attract and absorb all dirt particles into the cloth and away from the screen.

The anti-static CleanSafe spray is specially formulated for sensitive screens. It is completely environmentally friendly containing NO CHEMICALS, it does not remove the screen coating, forms a protective layer and repels dust from the screen.

SCREEN
CLEANING PACK

E-cloth[®] CleanSafe[®]

NEW

SCREEN CLEANING PACK

cleans and protects LCD, Plasma and TFT screens

recommended by **PHILIPS**

- E-cloth attracts and absorbs dirt and can be washed over 300 times.
- *CleanSafe* Spray (over 300 sprays) is a perfectly safe way to clean and protect sensitive surfaces.

How to use your Screen Cleaning Pack

1. Wipe the screen with the E-cloth and make sure that it is clear of all dust and dirt.
2. Spray the screen with the CleanSafe Spray, fold the cloth again and wipe any excess spray from the screen.

The spray provides anti-static protection, helping to reduce the build up of dust and dirt.

N.B. Care must be taken to ensure that no spray or liquid runs can enter sensitive equipment.

You have purchased part of a complete cleaning system, which, if correctly introduced, will eliminate most household cleaning chemicals.

The E-cloth range is available in stores and on

E-cloth Washing Instructions

A warm rinse is often enough for day-to-day use.

However, for E-cloths to perform correctly, they must be washed regularly. They may be machine washed at 60°C, but for a full clean, wash at 90°C or boil in a saucepan.

Use only a small amount of washing powder and rinse well. Do not use bleach or conditioner as bleach breaks down the fibres and conditioner will block them. Tumble or hang dry.

N.B. Colour may run, initial washes must be separate at 60°C. For washing machines, a washing bag is recommended.
