All illustrations are for representation only, your model may vary from illustrations shown.

SPEED SETTINGS

Refer to the following mixing guide for your speed selections.

SETTING	FUNCTION	DESCRIPTION
0	OFF	Standby and storage - Please note the beaters will only eject if set to the 'OFF' position.
I	BLEND	To combine liquids or to knead & mix dough
2	BEAT	To cream butter and sugar, make biscuit mix, cake mixes and icing
3	WHIP	To whip light and fluffy mixtures, make whipped cream, beat eggs and mash potatoes
4	TURBO	For an extra bit of power for stubborn mixtures.

As you add ingredients, the consistency of the mixture may change and you may require a higher or lower speed setting.

GETTING STARTED

Before handling the beaters, or balloon whisk, ensure the mixer is unplugged from the electrical outlet and the speed control switch is set to the '0' position.

Ensure you insert the correct beater into the correct hole. Match the shape on the underside of the mixer to the shape on the beater stem. Insert the beaters with a slight twist and push action until they click in to place.

GETTING STARTED CONTINUED

The mixer should be stood on its base when not in use. This will raise the attachments off the work surface to minimise mess.

Do not strike attachments on the rim of bowls, especially glass bowls. To remove any excess ingredients off the attachments, use a rubber or plastic spatula to

After you have finished mixing, turn the speed control to '0' and

Raise the mixer head and press down on the beater ejector button to eject the beaters. Note: The speed control must be set to '0' to release to beaters.

RETRACTABLE CORD

After each use, for easy and tidy storage, wind the power cord into the body of the mixer by turning the swivel base clockwise in the direction shown by the arrow on the mixer body.

CLEANING & CARE

WIPE BODY

To prevent cord damage always pull power cord out gently. If the cord jams, rotate the swivel base counter clockwise half a turn, then pull out the cord. Do not pull cable past the red indicator on the power cord.

SAFETY CUT OUT

To protect your hand mixer, it is fitted with an overheat cutout, which will automatically stop the handmixer if overloaded.

If this happens, turn the speed control to '0', unplug and eject attachments.

Allow the hand mixer to cool to room temperature before using

GETTING STARTED CONTINUED

The balloon whisk can fit into either hole. Grasp the handle of the mixer with one hand and the whisk stem with the other hand and insert the whisk with a slight twist and push action until they click in to place.

Ensure you insert the correct dough hooks into the correct hole. Match the shape on the underside of the mixer to the shape on the dough hook stem. Insert the dough hooks with a slight twist and push action until they click in to place.

Hold the handle in one hand and pull the the plug until the cord is fully extended.

Do not pull further than the red indicator on the cord.

Ensure the cord is fully extended when in use.

Plug the cord into a standard electrical outlet. Select the speed setting that

matches your mixing task.

Turn the speed control to '0' and unplug electric cord from electrical outlet before cleaning. Wipe the mixer body clean with a dry cloth.

Wash the beaters, dough hooks and whisk in hot soapy water after each use. Rinse thoroughly

The beaters, dough hooks and balloon whisk are all dishwasher safe. Use a wash cycle below 40°C. Remove prior to drying cycle.

The main body is not dishwasher safe.

Detach the beaters from the mixer and store them carefully. The mixer should be stored with the cord retracted into the body, the plug inserted into the plug storage and stood on the swivel
