

The Fruit Fly Trap from Zero In attracts and kills fruit flies without using hazardous chemicals. The product is hygienic and can be safely used near fruit, vegetables and open wine bottles to provide up to 30 days of continuous and discrete control. Fruit flies are attracted to the non-toxic lure, then drawn down into the trap from where there is no escape. Just pour the solution provided into the trap and place in the worst affected area. For severe infestations, or protection of a large area, use more than one trap.

DIRECTIONS FOR USE

- Peel foil tab off from the Fruit Fly Trap.
- Open the attractant lure and pour the solution into the trap to dissolve the granules already inside the trap.
- Place the trap(s) in areas where fruit flies have been seen, such as kitchen areas, near fruit or open wine bottles.
