Carpet Moth Trap

DIRECTIONS

moth STOP!

CAPTURE
AND ALERT

Carpet Moth Trap

The Moth Trap is specially developed to monitor, attract and trap moths without the use of harsh chemicals. It uses the latest Pheromone Technology to attract adult moths and trap them on the large 100 sq.cm sticky surface area.

The Moth Trap is a first alert to check for infestations and monitors the effectiveness of moth treatments.

The unit is refillable, each sticky board lasts up to 8 weeks and has a visual end of life indicator to confirm when it must be replaced.

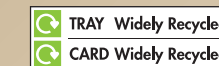

The slimline case fits easily under furniture or neatly against skirting boards (attaching the unit using

small double sided sticky pads provided, if required) to monitor carpeted areas and other high risk items.

To activate the end of life indicator press the red button on the left hand side. When the red ink reaches the red zone it is time to change the sticky board.

CAUTION:
Keep out of reach of children.

WARNING:
Do not allow fabrics to come into contact with the sticky boards.

We'd love to hear from you.
