FOR THE GRASS

Wrap the grass stencil around the base of the cake, using a pin to attach it to the cake so you can avoid spraying your hands. Spray thin layers to build up the colour. To give the grass depth, shift the template by a few centimetres and apply a darker layer of colour.

Attach the cloud stencil to a wooden

skewer or cocktail stick. This will help prevent colour from getting on your hands. Starting at the top of the cake, apply thin coats of colouring around the edge of the stencil. Mask out the areas where you would like clouds.
