

HG[®]

bathroom

bath SHINE

HG bath shine

- Makes all sanitary fittings (wash-basins, bath tubs, acrylic bathtubs, toilets, taps, tiles) shine.
- Removes bath oil marks, soapy and organic matter, fat and light limescale.
- Does not contain abrasives or aggressive components, that is why it can be applied safely on all glazed, chrome plated, enamel, plastic and painted surfaces.
- Does not affect colouring in any way.
- Prevents the build up of limescale when used regularly.
- Dries without streaks.
- Fresh fragrance, very economical in use and excellent as a mild cleaner or a floor cleaner.

Directions for use:

For cleaning with a sponge: Pour a few drops of HG "bath shine" on a damp bath sponge and use the sponge to clean the surface. Apply a thin line of HG "bath shine" immediately on extremely dirty rims in the bath tub or on an acrylic bath; clean the surface with the sponge after the soaking period and then rinse off.

As a mild cleaner or a floor cleaner: Pour a dash of HG "bath shine" in a bucket or bowl with lukewarm water, and you have great soapy water that you can use to clean larger surfaces, such as walls and floors, quickly and without streaks.

Attention: Transport and store the bottle upright. Do not use on marble or other limestone surfaces. For these surfaces use HG "natural stone bathroom cleaner". For the removal of difficult to clean built-up stains, such as limescale, yellow stains, rust stains, etc., it is best to use HG "professional limescale remover" (hagesan blue).

- Medical personnel can request the data sheet via +31 (0)36 54 94 777 • The consumer's information sheet can be obtained via www.HG.eu
