BUBBLES FOR PROSECCO

Add a little sweetness to your fizz! Drop a teaspoon of peach and/or strawberry bubbles to your prosecco, champagne or cava!

If you fancy something extra special try this:

- A glass of fizz
- A dash of gin
- A dash of elderflower cordial
- A squeeze of lemon

Pour elderflower cordial, lemon juice & gin into your champagne flute. Top up with fizz and add one teaspoon of peach and/or strawberry bubbles. Some will float and some will fall, so use your straw to get them all!

YOUR FIZZ!**

MAKES 6 - 8 SERVINGS

Add a teaspoon of bubbles to your glass of fizz! Some bubbles will slowly dance their way to the top of your glass for you to nibble off and others can be sucked up through the telescopic straw inside this box.

Enjoy the bubbles with a sip of fizz, bite and feel them burst in your mouth with juice! They keep their shape & flavour until you burst them.

What am I made from?

The shell is made from seaweed extract and they are suitable for vegans and coellacs!

What else do I go well in?

They go great in most cold drinks! Add them to cordials, milkshakes, cocktails & prosecco.
