

EDEN PROJECT COFFEE CAPSULES

These home-compostable coffee capsules let you enjoy great tasting coffee without contributing to landfill.

The capsules can be put in your council food waste collection or composted in your own garden compost heap.

The capsules are made from biodegradable bioplastic and produced using energy generated from wind, sun, hydropower and biogas – so don't contribute to climate change either.

Free from aluminium and oil-based plastic!

LUNGO COFFEE

Blended and roasted specifically to be enjoyed as a long pull (lungo) double espresso shot.

Hand-selected robusta and arabica beans with a full-bodied intensity and lasting rich flavour. A vibrant, clean and smooth aromatic coffee.
