

EDEN PROJECT COFFEE CAPSULES

These biodegradable capsules let you enjoy great-tasting coffee without contributing to landfill.

The capsules can be put in your council garden waste collection or composted in your own garden.

Coffee grounds are also good for your garden, adding nitrogen-rich matter to the soil.

The capsules are made from biodegradable bioplastic and produced using energy generated from wind, sun, hydropower and biogas – so don't contribute to climate change either.

Free from aluminium and oil-based plastic!

GUATEMALAN SINGLE ORIGIN COFFEE

A beautifully delicate coffee with medium/low acidity, notes of almond, brown sugar and hazelnut. A bold chocolate mouth feel finishing with sweet caramel.

VIBRANCY	1	②	3	4	5
