

LAKELAND

STAINLESS STEEL FLASK

Care and Use

- Before first use clean the lid with diluted washing up liquid and rinse thoroughly. To clean the flask fill with washing up liquid and boiling water. Stand for five minutes and rinse thoroughly.
- The container should be periodically cleaned. The best results are obtained using a mixture of water and bicarbonate of soda or washing up liquid. Rinse thoroughly.
- DO NOT USE BLEACH WHEN CLEANING THE FLASK.
- In order to minimise bacterial growth do not use to keep milk products or baby food warm.
- Do not use to store or carry carbonated drinks.
- Do not overfill the flask.
- When pouring hot water into a flask it is advised to do so over a sink.

If using flask with hot liquids

When using your flask with hot liquids, fill with boiling water for 5-10 minutes to pre-heat, empty and fill hot liquid. Liquids should be as hot as possible and poured into the flask immediately. Ensure that the lid is secured tightly.

If using flask with cold liquids

When using your flask with cold liquids fill with cold or iced water for 5-10 minutes to pre-cool, empty and fill with cold water. Liquids should be as cold as possible and poured into the flask immediately. Ensure that the lid is secured tightly.
