

### Hints & Tips:

- The level of starch required is a personal thing. You may adjust the quantities slightly to suit.
- For a softer finish (ie for shirts and other items of clothing), add more cold water. For a really crisp result add less cold water.
- If machine washing, check fabric conditioner compartment is clean after use.
- Iron on steam setting. If iron is too hot, it may burn the starch.
- Do not use in food.
- Keep out of reach of children.
- If ingested seek medical advice.
- Store in dry conditions.

### Directions for use:

Hand wash (for best results)

1. After washing, spin or wring out articles
2. Dissolve 4 tablespoons of starch in a little cold water.
3. Add 2 pints (or 1 litre) of boiling water, stirring continually, then add 2 pints (1 litre) of cold water.
4. Immerse each item separately and wring out.
5. Allow to dry naturally and iron whilst damp.

### Machine wash:

1. Stop the machine as it reaches the final rinse.
2. Add 5-6 heaped tablespoons of the starch dissolved in approx 150ml of warm water to the fabric conditioner compartment of your machine.
3. Restart the machine immediately to complete the final rinse.
4. Remove items when the machine has stopped.
5. Allow to dry naturally and iron whilst damp.
